

You are INVITED

How to keep your hull clean

Nelson Marina Hardstand

1.00pm to 4.00pm

Saturday 28 March 2020

Free training for all boaties and professionals. Learn from the experts how to get the best value from your anti-fouling, and go in the draw to win some free anti-foul paint.

Carboline New Zealand, a leading manufacturer of marine paints, is teaming up with the TOS Marine Biosecurity Partnership and Nelmac to bring you this opportunity to understand the hows, whys, dos, and don'ts of antifouling.

Good hull maintenance ensures you use less fuel, get to your destination faster, and do not spread marine pests. New rules in Marlborough ban highly fouled vessels from moving in and out of the region, while existing rules in Tasman and Nelson require control of Mediterranean fanworm (*Sabella spallanzanii*). This training will help you understand best practice to get good performance from your antifouling, how to prepare surfaces and apply paint. We will also cover what you need to know about the new rules and how to recognise pests.

Any queries ring or email Peter Lawless, Top of the South Marine Biosecurity coordinator at 021 894 363 or tosmarinebio@gmail.com

Note: This is a drop-in session. Arrive any time from 1.00pm to 3.30pm and we will include you.
